## TV Technology Industry Jobs

**NEWPORT TELEVISION CHIEF PHOTOGRAPHER:** WPTY-WLMT ABC affiliate in Memphis, TN, is seeking a Chief Photographer for its news department. The ideal candidate has a passion for news and an ability to manage. This person should have outstanding photography skills and the ability to coach and train both experienced and new photojournalists. This candidate will lead a staff of 10 photographers. The Chief Photographer will manage a fleet of cars, live trucks and a satellite truck. Other duties include coordinating photographer assignments and schedules; maintaining and ordering photographic equipment and participating in the strategic planning/development of news contents and budgets. Applicants should have a minimum of seven years experience including shooting, live truck operation and management. Candidates must have strong computer and news gathering skills with solid news judgment. Three to five years of experience is necessary and knowledge to the Memphis market is preferred. Valid driver's license, car and insurance required. Position includes nights and weekends. **Peter Jacobus, News Director; Newport Television, LLC; 2701 Union Avenue Extended; Memphis, TN 38112.** Or email to: [HR-News@abc24.com](mailto:HR-News@abc24.com). **No Phone Calls Please. Equal Opportunity Employer. A NEWPORT TELEVISION STATION.**

**Innovative Technologies is seeking a Chief and Asst Chief Engineer** with a CTS AND SBE broadcast engineering certification and a Broadcast Engineer with a SBE Certification. Please send resume to [jlightburn@lti-corp.com](mailto:jlightburn@lti-corp.com). [www.lti-corp.com](http://www.lti-corp.com).

**IMMEDIATE OPENING Chief Engineer, Hoak Media Corporation Television Station.** A Hoak Media Corporation station seeks an experienced broadcast Chief Engineer who will be responsible for operation and maintenance of all technical facilities and equipment at one of its television stations. The successful candidate will have sound knowledge of all FCC rules and regulations pertaining to broadcast television technical operations. A minimum of ten years in operational broadcast television engineering and maintenance experience is a requirement. Comprehensive VHF or UHF television transmitter, microwave and IT knowledge is a prerequisite for this position. The successful candidate can expect to be directly involved with technical budgeting, bench work troubleshooting as well as planning and purchasing equipment and capital items. Please forward resume including qualifications and references to [hr@hoak.net](mailto:hr@hoak.net). Hoak Media Corporation is an Equal Opportunity Employer. All applications will be held in confidence.

**Broadcast Maintenance Engineer** - Reporting to the VP Engineering, the Broadcast Maintenance Engineer will be responsible for the successful maintenance and repair all broadcast equipment, uplink transmitters, antennas, etc. Work as part of a collaborative Engineering/IT team to include EIC and on-call duties. **TO APPLY: Submit resume and cover letter via <https://home.eease.com/recruit/?id=56338> E.O.E.**

**Technical Operations Manager:** WABC-TV, New York, is looking for an individual with a solid technical and management background to oversee the day to day operations of our multi-stream on-air operation and assist in the design and implementation of new systems to support these operations. The successful candidate will need to have 6 or more years experience overseeing broadcast News and Master Control / On-Air operations at a major market television station. This position includes managerial responsibilities as well as the need for an in-depth understanding of complex digital video, digital audio, and LAN systems, with a proven ability to diagnose and rectify problems associated with these file-based systems quickly. Excellent communication skills are required as this person will be required to work closely with Traffic, Sales, News and Programming departments, as well as establish operating procedures and train personnel. We are looking for a candidate with experience in the following areas: Budgeting, implementing new technologies, personnel scheduling, and technical documentation using AutoCad. The individual in this
